DETAILED ACTION

This action is in response to applicant's amendment/arguments filed on 2/21/2007. **This action is made FINAL.**

Response to Arguments

Applicant's arguments with respect to claim 7 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by **Fukuda et al. (USPN 2003/0040346)**.

Consider **claim 7**, Fukuda et al. clearly disclose a portable information terminal (read as portable terminal; see Abstract) with camera, comprising:

a case 10 (read as first housing) and a lid member 12 (read as second housing) which are linked to be displaceable (read as movably connected to each other) (see Figure 1A and [0083]);

an image pick up module (18) (read as image pickup device) is arranged in said case 10 ([0084]); and

an adapter optical system (23) (read as conversion lens; see [0085]) is arranged in the said lid member 12 (see Figure 1A),

wherein the optical axis of said image pick up module (18) and that of said adapter optical system (28) substantially agree with each other (i.e. identical) when the portable terminal is folded (first state where the first housing and the second housing are laid on each other so that a focal length of the image pick up module (18) is converted from a focal length when the portable terminal is not folded (second state where the first housing and the second housing are arranged differently from the first state) ([0091] and [0092]). In addition, case (10) (read as first housing) and lid member (12) (read as second housing) are slidably connected together (see fig. 18; [0061; 0147]).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2618
